JAMES HANISCH

DIRECTOR OF PERFORMANCE SCIENCE

NFL Experience: 7th season (*7th with Eagles*)
College: South Australia Hometown: Adelaide, Australia

James Hanisch is entering his seventh overall season with the Philadelphia Eagles and fourth as the team's director of performance science. Hanisch brings 14 years of experience working at the collegiate and professional levels, both in the United States and Australia, to the Eagles' sports medicine and performance department.

Hanisch, who was promoted to director of performance science in 2017, is responsible for the execution of Philadelphia's sports science program. Hanisch utilizes an array of technologies to better manage the overall physical and emotional wellness of players.

From 2015-17, Hanisch served as the Eagles' high performance analyst, specializing in collecting and interpreting sports science data to assist with player health management.

Prior to joining the Eagles, Hanisch worked as a sports science coordinator at the University of Oregon (2013-15). He assisted in organizing the programming, interpretation and delivery of a newly formed sports science program to coaches and players.

Hanisch spent seven seasons in the Australian Football League as a performance analyst with the Brisbane Lions Football Club (2010-13) and Adelaide Football Club (2007-10) before transitioning to collegiate football in the United States.

A native of Adelaide, Australia, Hanisch attended the University of South Australia, where he studied human movement (applied science). He completed his degree at Colorado State University as part of a student exchange program. Hanisch resides in Philadelphia, PA, with his wife, Coby, and their two children, Boston and Chloe.
